 - **Program/Activity Map**
 - Filters have been added for easy navigation and management within the hierarchical levels.
 - Inline editing is now available at the Activity Map level.
 - **Program/Hierarchy Levels**
 - Configure functionality is now available for all hierarchy levels – Projects, Workstreams, SubWorkstreams, Milestones, Tasks and SubTasks.
- **Importing & Exporting Improvements**
 - **Importing**
 - **Activity Map** – The below use cases now displays warning messages during the importing process:

- **Use Case #1:** A single or multiple users involved.
If a user exports the Activity Map and is working on updates in the Excel template and then returns to the UI (or could be another user) and deletes a Task, Milestone, etc. from the UI, during importing of the Activity Map a warning message is displayed stating that the “Object with this ID is deleted, any updates will be ignored.”

- **Use Case #2:** If a user doesn't have permissions to update an activity, a warning message will be displayed stating "You don't have 'Update' permission for this item, any updates will be ignored."
- **Exporting**
 - **Files** – exported files will display the deal name, date and time stamp, and the time zone.
